**D.C. SOLENOID SWITCHES & CONTACTORS**

## ALBRIGHT - RoHS (2002/95/EC) COMPLIANCE CERTIFICATE

As part of our commitment to the RoHS Directive (2002/95/EC) Albright have been working towards ensuring products supplied will not contain any banned substance, in particular the items which are topical at present - lead (Pb), mercury (Hg), cadmium (Cd), hexavalent chromium (Cr (VI)), polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE).

Material	Date Albright have material removed from all products manufactured after:
Cadmium (Cd)	Week 10/2006
Mercury (Hg)	Week 10/2006
Cr 6+ (Hexavalent Chromium)	Week 10/2006
Polybrominated Biphenyls (PBB)	Week 10/2006
Polybrominated Diphenyl ethers (PBDE).	Week 10/2006
Lead (Pb)	Week 10/2006

Albright is implementing a process to place individual marking to our packaging list to state the item does not contain each of the above products. This will be in the format

The items shown below are RoHS (2002/95/EC) compliant with the exception of any marked \*

On the product label there is a date code, with WW/YY designation.

Items manufactured with date code 10/06 or after will be guaranteed RoHS compliant.

\*The only products which we have stock and will not be compliant by week 10 due to lead content within the solder are some printed circuit controller boards, in particular "ML" and "CC" variants. Status of these will be advised on an individual basis.

Part numbers will not be affected by the above implementation.

Should you have any further questions please direct to [technical@albright.co.uk](mailto:technical@albright.co.uk)

Signed: .....  
 Peter Digance - Technical Manager
