

BATTERY CHARGERS

CURTIS

PICCOLO

DESCRIPTION

The Piccolo battery charger works from a single-phase supply to re-charge wet-cell batteries over a 12 hour period and is available in either 12V or 24V models.

APPLICATION

The Piccolo is ideal for use with order pickers, pallet trucks, sweeper/scrubbers, stackers, tugs, mobility, golf and leisure vehicles.

FEATURES

- Single-phase mains supply 230VAC 50/60Hz with adjustments for 220V and 240 voltages 5 x 3W LEDs.
- Control board suitable for 12V and 24V batteries.
- Automatic equalizing function with pulses packet.
- Automatic weekly maintenance function to keep the batteries charged during the non-use periods.
- Weekend maintenance option ensures batteries maintain their charge during non-use periods.
- Anti-noise filtering and overvoltage protection.
- Nine-hour security timer on the first phase.
- Automatic detection of battery connection and auto power-off.
- Electrical Protection: mains power and battery fuses.
- Final charge voltage threshold settled (no trimmer adjustment required).
- IP20 Rating.
